

Next.js is a powerful React framework that enables developers to build server-side rendered and statically generated web applications with ease. It provides features such as file-based routing, API routes, incremental static regeneration, and built-in CSS and Sass support. Next.js also offers optimized performance, automatic code splitting, and seamless integration with React, making it ideal for building modern, high-performance web applications. With its rich ecosystem and developer-friendly tools, Next.js has become one of the most popular frameworks in the React community.
